Diagram 3 illustrates the assembly of the front panel (FTL) and back panel (FTK). The FTL is shown with a series of screws (ZIE) being inserted into the back panel (FTK). A cable management system (ZIE) is also shown, which is used to secure the cables to the back panel (FTK).

This diagram illustrates the exploded view of the FTN assembly. It includes four main components: FTM (Front Top Module), FTL (Front Top Layer), FTT (Front Top Trim), and CNV (Cover). The components are shown in their relative positions, with dashed lines indicating the assembly path and alignment points. The FTL is the base layer, and the FTM, FTT, and CNV are stacked on top of it. The FTM and FTT are connected by a hinge mechanism, and the CNV is attached to the FTT. The diagram also shows the internal structure of the FTL, including a series of small holes or pins along its length.
